

VAR

SKULL CASTING

Also called Consumable Casting, Retech furnishes Vacuum Arc Remelt (VAR) Skull Casting furnaces for a range of products, including aerospace, consumer, and commercial applications. We offer our customers a variety of equipment configurations, from single or multi-chamber designs to centrifugal, vacuum and tilt pour mechanisms. Our focus is to optimize the overall productivity and efficiency of each system based on customer needs.

Materials

- Reactive Metals
- Refractory Metals
- Amorphous Metals
- Super Alloys

Applications

- Precision Casting

Retech Casting furnaces and casting technology are suitable for a range of casting needs. From large ingots weighing many tons to turbine blades for the latest generation of jet engines, Retech can configure a furnace to meet your technical requirements.
